DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Nikolaus Schibli on Aug 5, 2005.

The application has been amended as follows:

- a) Insert the label Prior Art in Fig. 1 shown in red ink in the attached sheets of drawing.
- b) Regarding claim 1, on line 2, delete word: "the" before " signals".

Allowable Subject Matter

- 2. Claims 1-14 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests a method of obtaining a gain function by an array of antennae and a weighting of signals received or to be transmitted by vectors of complex coefficients. Generating a reference gain function by weighting vectors. The reference gain function is projected orthogonally onto the sub-space of the gain function. The weighting vectors are normed with respect to sub-space gain function. Thus gain function is invariant by change of frequencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
